

WebDemo™

Key Features, Descriptions and Benefits of WebDemo

Feature	Description	Benefits
Viewport Presentation	<p>WebDemo's Viewport feature creates a transparent window in the meeting Host's desktop that defines the region that meeting Attendees can see through their Web browsers.</p> <p>The meeting participant has the ability to resize the Viewport on their screen. The participant can either reduce or enlarge the Viewport.</p>	<p>The Viewport allows you to control what the meeting participants will see on your desktop.</p> <p>The WebDemo Viewport will allow you to click and drag your Viewport anywhere on your desktop. In addition you will have the ability to PAUSE the Viewport broadcast. In the pause mode you can setup other applications without your audience seeing what you are doing.</p>
Attendee List	<p>Displays to the Host and Attendees who are logged into the Web Meeting.</p>	<p>The Host Attendee List displays important performance detail and allows for enabling/disabling of Attendee communications features.</p>
Keyboard Chat	<p>Host and Attendees can communicate via Keyboard Chat.</p>	<p>Enhance collaboration by allowing Attendees to create private chat rooms.</p>
Raised Hand	<p>WebDemo enables Attendees to "raise their hand" to get the Presenter's attention.</p>	<p>When presenting, it is important to know whether your Attendees have a question, would like to make a comment, or even if they are listening.</p>
Enable Remote Control	<p>Remote control allows you to pass control of any document or application on your desktop to any remote participant thereby enhancing collaboration.</p>	<p>Train Attendees by showing them how to do a task and then providing them with control so they learn by doing.</p>
Transfer Host/Meeting Control	<p>WebDemo's transfer meeting control is safe and secure. WebDemo's Transfer feature allows users to transfer meeting control, including Viewport; whiteboard, and chat functions to meeting Attendees.</p>	<p>Exceptional when more than one person is required to present content from their own computer desktop.</p>
Transparency Tools	<p>The Transparency Tools include drawing options such Font, Line Thickness, Square, Circle, Cut/Move or Color Selector.</p>	<p>To further enhance the online demo experience, you can use WebDemo's transparency tools to illustrate, highlight or annotate a document or an element within a desktop application.</p>

True Color Representation	True colors between 256 colors and High Color (16-bit to 24-bit) are available for added enhancement to the presentation.	Presentations immediately gain more impact and accuracy with true colors.
Hide Desktop Icons	Use the Hide Desktop Icons feature to create a whiteboard.	Use your computer desktop as a blank whiteboard by hiding your desktop icons while maintaining a secure background.
Outlook® E-mail Integration	The Outlook E-mail Integration integrates Microsoft Outlook® and WebDemo by allowing a meeting session to be scheduled in Outlook from an e-mail produced by WebDemo.	Meetings can be scheduled in the attendee's Outlook Calendar from the e-mails sent by the meeting presenter.
Reports	The WebDemo reports feature allows Administrators to generate daily, weekly, monthly reports. The reports include showing number of current active users, number of current active sessions, number of total sessions and individual user/session metrics.	Determine if you need additional users to train more customers or to generate more leads with more sessions. Can help to determine sales metrics.
Snapshot	Use annotation tools to highlight information quickly and conveniently and then take a snapshot of your visual and save your changes.	Capture any visual and or changes on your computer and save it for later editing.
Application Sharing	Presenters and Attendees can share any software application, including their entire desktop, in a live, full-screen demonstration. Everyone can use the markup tools to emphasize a point right on the live application.	Leverages existing communications and interaction. Helps participants collaborate in real time to solve problems, exchange ideas and apply solutions on the fly.
Co-browse	When the meeting Host initiates a Co-browse session, an Internet Explorer Web browser launches on the Host computer as well as on each attendee's computer.	This feature allows the Host to navigate the attendee to any page on a Web site. The attendee can bookmark and save the Web page, and personally interact with a Web enabled software application since the browser is resident on the attendee's computer.
Record & Playback	WebDemo's Record and Playback captures everything in your session including live	Capture live meeting or training sessions and make the session's available on-demand or save the

<p>Record & Playback continued</p>	<p>demonstrations, annotations, notes, visuals and even live Web slides.</p> <p>From the server export your recording to an AVI file. As an AVI file you can edit, produce, or convert the file into another format such as flash or streaming video.</p>	<p>recording on your desktop so you can email your recordings to anyone.</p> <p>Meetings are automatically recorded on the server or you can create and save the recording on your desktop.</p>
<p>File Broadcast</p>	<p>Drag and drop any file to all meeting participants in real-time. File Broadcast allows the presenter of a WebDemo meeting to broadcast files to any or all Attendees.</p>	<p>As a result, files of any type can be distributed quickly to all meeting participants.</p>
<p>Voice Chat over the Internet</p>	<p>Presenters can broadcast voice dialogue over the Internet and enable voice privileges to selected attendees and conduct a discussion.</p> <p>A wave file or real media player can be broadcasted to your audience. Or broadcast sound from your PowerPoint presentation.</p>	<p>Fully integrated, multi-way, full duplex voice over the internet offers dramatic cost savings over traditional conference calls.</p>
<p>Video Conferencing</p>	<p>Use your standard PC Web Cam to broadcast your "live" image to Attendees in your online meetings. This feature includes selectable frame rate speeds up to 30 frames per second.</p> <p>In addition, the Presenter can enable Web Cams of Attendees' for a group videoconference.</p>	<p>Use the Video conferencing feature to broadcast a re-recorded .avi file or live image. Adding visuals can add impact to your presentation.</p>
<p>Document Management</p>	<p>All WebDemo users (registered and unregistered) can place and view Public documents by selecting Public Area off the menu in the left column.</p>	<p>Makes sharing files fast and easy. Easy access to stored documents.</p>
<p>Polling and Quizzing</p>	<p>Collaborate with your audience with true/false, yes/no questions or multiple-choice questions.</p> <p>The results can be tallied dynamically which in turn you can display to all participants.</p>	<p>Use the polling reports to determine overall success of training programs, seminars, and meetings.</p>

Join a Meeting	Unique meeting numbers are automatically generated for every meeting. Immediately join a meeting by selecting the desired meeting and entering the confirmed meeting number.	Eliminates confusion as to which meeting sessions to attend.
Cancellation/Rescheduling	Meetings can be easily cancelled and rescheduled with new meeting dates and times.	Ideal for providing immediate cancellation or rescheduled meeting notices when conferences or sessions cannot be held as specified or planned.
Email Invitations	Email invitations are sent to participants that include agenda information.	Provides meeting information as well as an embedded hotlink to simplify joining a meeting. Attachments and meeting passwords can be included.
No Client Software	Client software or plug-ins is <u>not</u> required.	Browser-based JAVA technology allows Attendees to participate using only a Web browser and an Internet connection.
